

NYU GROSSMAN SCHOOL OF MEDICINE
Faculty Position in Vascular and
Interventional Radiology for dual fellowship
trained Pediatric and Adult interventional
radiologist

The New York University School of Medicine of the NYU Langone Medical Center invites nominations and application for a faculty position in the Vascular and Interventional Radiology Section in the Department of Radiology. The candidate should either have strong experience with pediatric interventions or have completed a pediatric IR fellowship. An adult IR fellowship is mandatory.

The Hassenfeld Children's Hospital at NYU Langone Health is a tertiary children's hospital requiring advanced IR capabilities. There is an associated robust vascular malformations clinic (directed by Dr. Francine Blei) and a busy pediatric oncology service.

The VIR Section covers 5 hospitals: NYU Tisch Hospital, Bellevue Medical Center, Hospital for Joint Disease, the Manhattan VA, and NYU Brooklyn. These five core institutions provide a tremendous wealth of clinical material encompassing all of the major areas within interventional radiology.

The VIR Section performs over 9,000 procedures a year, including arterial and venous interventions, interventional oncology interventions, uterine artery embolization, prostate interventions, interventions for fertility, portal interventions, and biliary and urologic interventions. Inpatient cases stem from very active hospital services including liver and kidney transplantation and Level I trauma center designation. Three of the core institutions serve as designated regional referral centers for chronic liver diseases. Our interventional oncology program includes radioembolization, chemoembolization, radiofrequency, microwave, and cryoablation. We have an active outpatient clinic and VIR admitting service, assisted by advanced practitioner support.

The Section has an approved IR/DR dual certificate pathway, and provides outstanding training at to medical students and residents as well. We participate in NYU Radiology directed continuing medical education courses.

The NYU Department of Radiology enjoys a reputation as a world-renowned leader in research and clinical excellence, and the residency program is acknowledged as one of the best in the country.

A competitive candidate will have an M.D. degree with American Board of Radiology Certification, advanced clinical and procedural skills, and a strong interest in NYU's academic mission. A demonstrated commitment to training, education, and/or research is highly valued.

NYU Langone Medical Center is an equal employment/affirmative action employer and does not discriminate on the basis of race, color, religion, gender, gender identity or expression, sexual orientation, marital/or parental status, age, national origin, citizenship, disability, Veterans status, or any other classification protected by applicable Federal, State, or Municipal Law.
