

Be a Tar Heel! Join Our Growing Pediatric Interventional Radiology Team at UNC-Chapel Hill

The Department of Radiology at the **University of North Carolina at Chapel Hill** is seeking a **full-time Pediatric Interventional Radiologist** to join our expanding team. This is an exceptional opportunity to shape the future of pediatric IR in North Carolina while living in one of the nation's most desirable college towns.

At UNC, you'll join a vibrant academic medical center with a mission to **advance health through excellence in patient care, education, and research**. Our pediatric IR division performs a wide range of vascular and non-vascular interventions, caring for children with complex needs, including vascular malformations, oncologic disorders, solid organ transplants, and more.

This role offers the unique opportunity to not only provide outstanding clinical care at the **UNC Medical Center**, but also to play a pivotal part in **planning vascular and interventional services** for the new **North Carolina Children's Hospital**—the state's first free-standing, independent children's hospital, scheduled to open in the early 2030s. In partnership with Duke, this 400-bed facility will redefine pediatric care for the region.

Why UNC?

- Work at one of the nation's top public universities, consistently ranked for innovation, research, and service.
- Live in **Chapel Hill**, a community nationally recognized as one of the best places to live, with rich cultural, recreational, and professional opportunities.
- Enjoy a **comprehensive benefits package**, professional growth opportunities, and a strong commitment to work-life balance.

If you're ready to bring your expertise and vision to a world-class team—and help build the future of pediatric interventional radiology in North Carolina—we **invite you to apply and Be a Tar Heel!**
