

## **Pediatric Radiology Clinical Fellowship - for Academic Year 2026-2027**

We offer an outstanding Pediatric Radiology Fellowship to qualified candidates. The training program leverages the vast resources of [Stanford University](#), the [School of Medicine, Stanford Children's Health](#), Lucile Packard Children's Hospital (LPCH), and pediatric radiologist faculty with strong interests in education, research, and subspecialty care. Stanford Pediatric Radiology Fellows are exposed to a high volume of complex clinical case material in a structured, hands-on educational approach.

Stanford Medicine Children's Health and LPCH have 461 licensed beds, 590,000 annual clinic visits, 14,000 admissions, 20,000 emergency room visits, over [4000 annual deliveries](#), over 65 Bay Area locations, and a high volume emergency department, including a Level 1 pediatric trauma center. Our program leverages six centers of excellence, including a high acuity obstetrical/neonatal service, the [Bass Center for Childhood Cancer and Blood Diseases](#), a robust children's [heart center](#), a high volume [orthopedic and sports center](#), and a [pediatric brain and behavior center](#)

The Pediatric Radiology faculty are devoted to teaching, patient care, translational research. The faculty include subspecialists with expertise in neuroradiology, cardiovascular imaging, musculoskeletal imaging, body imaging, nuclear medicine, fetal/obstetrical imaging and interventional radiology. The fellowship provides a comprehensive educational curriculum, including didactic lectures, case conferences, and multi-disciplinary conferences. In addition, elective rotations and research time are provided, and a second year of fellowship to further subspecialize may be available.

Fellows rotate through various services, including MRI, CT, fluoroscopy, ultrasound, neuroradiology, nuclear medicine, interventional radiology, and general radiography. They have an opportunity to work closely with radiology residents and medical students.

Prerequisites for entering this program include a valid California Postgraduate Training license or Medical License and completion of a Diagnostic Radiology Residency.

Applications will open November 1, 2024 and can be found on our website at <https://pedimaging.stanford.edu/form/clinical-fellowship-application>
