

The University of Michigan Department of Radiology is recruiting a fellowship-trained Pediatric Interventional Radiologist with high integrity and a strong commitment to professionalism to lead our ever growing Pediatric Vascular and Interventional Radiology team with an emphasis to establish and develop a Pediatric IR Fellowship program. We encourage application at all levels of faculty experience – Instructor, Assistant or Associate Professor, or Professor. We emphasize mentorship, career and leadership development, and interest in research and innovation in a culture that embraces diversity and collaboration.

The VIR Division provides clinical care at the University Hospital, Frankel Cardiovascular Center, C.S. Mott Children's Hospital, and Von Voigtlander Women's Hospital on our main campus, in addition to several Michigan Medicine ambulatory care facilities and the Ann Arbor Veteran's Affairs Hospital. The IR Pediatric Interventional Radiologist will be dedicated to our C.S. Mott Children's Hospital where we have 1 Angio Suite with a state-of-the-art bi-plane Siemens system with another suite in the planning phase, a designated IR Reading Room and clinic office space, 2 dedicated Pediatric IR PA's and 1 dedicated Pediatric IR PCTA. Additionally, there is access to MRI and CT for image-guided interventional procedures. The interventional radiology division at Mott Children's Hospital performs approximately 1700 cases per year. Typical cases include vascular access, enteric tube placement and exchange, solid organ visceral biopsy, percutaneous drainage, musculoskeletal intervention, and diagnostic and therapeutic venous and arterial interventions.

The department of radiology consists of 9 clinical specialties, including Vascular and Interventional Radiology. With approximately 150 faculty, we consistently rank near the top nationally in NIH funding, and within the top 10 post graduate radiology education programs. The Division provides training for 3 VIR integrated residents, 2 VIR independent residents, and 15 IR/DR residents. We have several advanced practice providers and continue to hire staff to meet our growing practice.

C.S. Mott Children's Hospital is located on the Ann Arbor Medical Campus of the University of Michigan. Connectivity to the Medical School and greater university campus provides opportunity for collaboration with a diverse faculty. Ann Arbor is consistently rated one of the top cities its size in which to live, work and play, and is a community ranked highly for raising a family. The city is culturally rich and provides excellent educational options for children. Many Faculty enjoy attending the diversity of music/theater/art and athletic events (#Go Blue) offered across campus. Detroit Metro Airport, a Delta Airlines hub, is approximately half an hour away, providing nonstop flights to most US and many international destinations.

Required Qualifications: M.D. or equivalent, ABR-certified or has passed the Core Examination and on track to take the certifying examination within 15 months of completing residency. Must have completed an ACGME-accredited fellowship in Vascular and Interventional Radiology, completed or be eligible to complete ABR-certification in Vascular and Interventional Radiology, and be able to obtain a medical license in the State of Michigan. Evidence of clinical competence and competence in teaching is expected.

This recruitment is open until filled.

How to apply: Qualified applicants should send their CV and a letter of interest to:
Missy Burgess
Administrative Assistant to Baljendra Kapoor, M.D.
