

Pediatric Interventional Radiology - AdventHealth for Children – Orlando, Florida

The Walt Disney Pavilion at AdventHealth for Children and AdventHealth Medical Group Radiology are seeking a full-time ABR fellowship trained Pediatric Interventional Radiologist to join our expanding subspecialized practice of six pediatric radiologists and one pediatric neuroradiologist. The pediatric radiology group interprets over 100,000 pediatric studies per year. AdventHealth Medical Group Radiology has 170 radiologists and provides a total of approximately two million exams annually.

This position will allow for the unique opportunity to fully develop the pediatric interventional radiology program at AdventHealth for Children. Extensive support from the administrative and operational teams of both AdventHealth for Children and AdventHealth Medical Group Radiology will be provided. The physician will have access to state-of-the-art equipment in a recently updated fluoroscopy suite, dedicated clinic space/time, and advanced practice provider support. Rotations occur at a single hospital site in central Orlando, and pediatric interventional call is covered by the adult IR section.

There is an engaging pediatric case mix with multiple opportunities for a pediatric interventional radiologist including:

- Development of a pediatric interventional vascular malformation clinic: our growing Children's hospital has a thriving pediatric dermatology group currently seeing vascular malformation patients. The ideal candidate would assist in developing the radiology components of this clinic, including overseeing imaging, and planning/providing interventional procedures.
- Involvement with the AdventHealth Transplant Institute team as needed for interventional procedures: AdventHealth for Children has an active pediatric transplant service and is the only hospital providing pediatric liver transplant in central Florida.
- Growing opportunity for musculoskeletal procedures following our recent partnership with Rothman Orthopedics.
- Oversight/management of pediatric interventional procedures including biopsy, abscess drainage, etc.

Requirements of the position:

- Board eligible or certified in Diagnostic Radiology with additional fellowship training in Pediatric Radiology and Pediatric Interventional Radiology.

Our Walt Disney Pavilion at AdventHealth for Children is a full service, tertiary children's hospital with over 200 dedicated pediatric beds, more than 30 peds ICU beds with a dedicated peds CICU, a 102 bed NICU, 17 bed pediatric emergency department and statewide pediatric network and transport system. We started our comprehensive pediatric open heart program in 2012 and have a strong track record of positive outcomes. We also have several key destination programs including our level IV Epilepsy program, the region's only BMT and solid organ transplants including kidney and liver, and we increased Orlando area NICU beds to 150 total in 2017. Our unparalleled network consists of 30 hospitals across the state with one children's hospital at the center totals over 23,000 births and several extremely successful pediatric subspecialty programs including outreach clinics. These 30 hospitals refer patients for tertiary and quaternary services to our main location near downtown Orlando. Our newest program has brought pediatric liver transplant services to Central Florida. In 2019 through 2024, AdventHealth for Children is recognized by US News and World Report as the best Children's Hospital for newborn care in Florida. We are also recognized by The Leapfrog Group as a top Children's Hospital for quality and safety, and we are a magnet designated hospital for nursing care.
