Interventional Radiologist –
Rady Children's Hospital San Diego

Location: San Diego, California

Join one of the nation's leading pediatric healthcare organizations and help shape the future of minimally invasive pediatric care. Rady Children's Hospital San Diego is seeking a full-time Pediatric Interventional Radiologist to join its growing Pediatric Interventional Radiology Program. This is an exceptional opportunity to advance innovative image-guided therapies, collaborate with leading pediatric specialists, and help improve outcomes for children with complex conditions throughout Southern California.

About the Program

Our multidisciplinary team of pediatric interventional radiologists, pediatric anesthesiologists, nurses, technologists, and child life specialists works collaboratively to deliver care in both inpatient and outpatient settings, including our dedicated Pediatric Interventional Radiology outpatient clinic and our state-of-the-art Dickinson Image-Guided Intervention Center. The team actively participates in multidisciplinary patient care with other pediatric subspecialists, including in the Vascular Lesions Clinic, Interventional Cardiology, Gastroenterology, Nephrology, Liver Transplant, and Pediatric Surgery, ensuring coordinated treatment planning and follow-up. Through these collaborations, we deliver individualized treatment plans that support the unique needs of each patient and family while ensuring the highest standard of pediatric care.

Advanced Technology & Innovation

The Pediatric Interventional Radiology Program uses advanced imaging technologies to perform complex therapeutic and diagnostic interventions using ultrasound, low-dose fluoroscopy, cone beam CT, and advanced MRI-guided technologies.

The program collaborates closely with the Dickinson Image-Guided Intervention Center, leveraging advanced imaging capabilities including real-time 3D MRI technology. This innovative environment allows physicians to perform highly precise image-guided procedures while supporting continued growth in clinical innovation, research, and program development.

Our Facility

- State of the art Canon Alphenix Suite
- 2 fully equpped GE ultrasound machines plus GE laptop portable ultrasound
- Access to Cath Lab biplane Siemens suites with adjacent MRI
- Dedicated clinic and office space

Clinical Scope

The program evaluates and treats vascular anomalies, lymphatic and chylous leaks, soft tissue and bone tumors, deep venous thrombosis, transplant complications, difficult vascular access, pleural effusions, pneumothorax, ascites, joint and spine pain, and infected fluid collections.

Procedures include angiography, embolization, sclerotherapy, image-guided biopsies, drainage procedures, lymphangiography, tumor ablation, vascular access interventions, gastrojejunostomy tube placement, joint and spine injections.

Academic & Institutional Environment

Rady Children's Hospital San Diego is nationally recognized for pediatric excellence and provides opportunities for quality improvement, clinical research, multidisciplinary collaboration, innovation, teaching, and leadership development. Our academic affiliation with the University of California San Diego affords opportunities for research, innovation, and teaching and training of residents and medical students.

Minimum Requirements

- MD or DO degree
- Board-certified or board-eligible in Interventional Radiology
- Pediatric Interventional Radiology fellowship preferred
- Eligible for California medical licensure
- Interest in multidisciplinary pediatric care, innovation, and program development

What We Offer

- Competitive compensation and comprehensive benefits
- Professional growth and leadership opportunities
- Access to advanced imaging technologies
- Collaborative, mission-driven culture
- Supportive multidisciplinary environment
- Exceptional quality of life in San Diego, California
