

Pediatric Interventional Radiology
Johns Hopkins All Children's Hospital
St. Petersburg, Florida

The Johns Hopkins All Children's Hospital (JHACH) Division of Radiology is recruiting a fellowship trained pediatric interventional radiologist to join our uniquely collegial team in sunny St. Petersburg, Florida! **JHACH is a 259-bed teaching hospital, ranked as a *U.S. News & World Report* Best Children's Hospital in 7 pediatric specialties (2023-2024) We are also ranked as the #1 Children's Hospital in Florida.** Qualified candidates are eligible for an academic appointment at both Johns Hopkins University School of Medicine and the University of South Florida. **(Academic appointments are optional for each candidate. Academic rank is open and commensurate with experience).**

JHACH provides the full spectrum of radiology procedures for children up to age 21. We are a Level 1 Pediatric Trauma Center servicing the surrounding area with expert pediatric care in nearly all subspecialties. More than half of the 259 beds are devoted to intensive care level services. JHACH is the regional pediatric referral center for Florida's West Coast with nationally recognized Cardiothoracic, Congenital Diaphragmatic Hernia, and Esophageal and Airway surgical experts.

We perform approximately 80,000 diagnostic radiologic studies annually on children of all ages including 2,100 interventional radiology-specific procedures (separately staffed by pediatric interventional radiologists). We are seeking a team-oriented candidate with a passion for quality care, and commitment to serving our patients, families, and clinicians. This physician will perform a broad range of pediatric interventional procedures daily including, but not limited to biopsies, drainages, ablations, venous access, joint injections, GU interventions, pain management interventions, thrombolysis, angiograms, trauma-related interventions, and sclerotherapy. A candidate with experience in vascular anomalies would be a valuable addition. The Johns Hopkins All Children's Vascular Anomalies and Birthmarks Program offers state-of-the-art, individualized care to patients, and we are the only health system on Florida's west coast with an on-site multidisciplinary team. The ideal candidate will have or gain the requisite skills to support and assist in the continual development of this program.

Desirable candidates will have formal training and/or experience with pediatric and/or interventional radiology. The ideal candidate will have completed (or be in the process of completing) a fellowship in pediatric interventional radiology.

Tampa-St. Petersburg offers year-round sunshine, abundant cultural and recreational activities, sports venues, and excellent schools. We are centrally located to many of Florida's amenities, minutes from the beautiful gulf beaches, two hours from Orlando, and four hours from Miami. To learn details, please contact:
