

## **Pediatric Interventional Radiologist – Rady Children's Health – Orange County**

**Location:** Orange County, California

Due to continued growth in clinical volume, expansion of our multidisciplinary programs, and a deep institutional commitment to faculty well-being and sustainability, the Section of Pediatric Interventional Radiology at **CHOC Children's Hospital, now part of Rady Children's Health - Orange County (RCHOC)**, is recruiting a **full-time Pediatric Interventional Radiologist**.

---

### **About the Practice**

Our team performs over **3,000 image-guided pediatric interventions annually**, with year-over-year growth exceeding 20%. We are the only dedicated pediatric IR program in Orange County and serve as a critical hub for patients across the region.

**RCHOC is unique in that Interventional Radiology is an independent department—purpose-built and equipped with dedicated capital investment**, not repurposed from other service lines. The department was developed specifically for pediatric IR and opened in **2025** with entirely new infrastructure and technology. This institutional design reflects RCHOC's deep commitment to the long-term success and autonomy of the IR service line, enabling strategic growth, programmatic development, and physician well-being.

The practice is now anchored by a **new, purpose-designed IR department**, located **within the perioperative space**, immediately adjacent to pre-op and post-op care areas. **Pediatric anesthesiology is always available**, ensuring seamless coordination and safety for both routine and complex cases.

### **Our facilities include:**

- **Biplane and single-plane Philips Azurion suites with fully equipped dedicated Samsung ultrasound units in each room.**
- **Embedded reading rooms and back-office support for integrated longitudinal care.**
- **Dedicated clinic space and staff provided in a new state-of-the-art on campus outpatient tower**, ensuring a seamless patient and family experience from consultation to intervention and follow-up.

## **We are supported by a multidisciplinary team that includes:**

- IR-dedicated APP
  - Pediatric-trained anesthesiologists
  - A collaborative network of referring providers across RCHOC's Centers of Excellence (e.g., Cancer, Neurosciences, and Heart Institutes)
- 

## **Procedural Scope**

We perform the full spectrum of pediatric interventional procedures, including:

- Vascular access
- Enteral and biliary interventions
- Vascular malformation therapies
- Embolization and angiography
- DVT/PE thrombolysis
- Craniofacial endovascular procedures
- Image-guided musculoskeletal interventions

RCHOC also supports a strong **Vascular Anomalies Center**, where IR plays a foundational role in **collaboration with hematology, plastics, dermatology, ENT, and genetics**.

---

## **Academic & Institutional Environment**

RCHOC maintains strong academic affiliations with **UC Irvine** and supports teaching of residents, fellows, and medical students. Opportunities for **research, innovation, and institutional leadership** are abundant and encouraged. The IR section plays an active role in hospital-wide initiatives to improve value, patient experience, and faculty engagement.

---

## **Minimum Requirements**

- MD or DO degree (or equivalent)
- Board-certified or board-eligible in Interventional Radiology
- Completion of a Pediatric Interventional Radiology fellowship preferred, but negotiable
- Eligible for California medical licensure
- Demonstrated interest in teaching, innovation, and/or multidisciplinary care

## **What We Offer**

- A **high-performing, mission-driven environment** with strong IR leadership
- Competitive compensation with **productivity and growth incentives**
- Full benefits package and we are PSLF Eligible
- Protected administrative and academic time
- **World-class location in the heart of Orange County, California**, offering unmatched quality of life, schools, and recreation
