

Now Hiring: Pediatric Interventional Radiologists

Seeking Qualified Candidates

Children's Healthcare of Atlanta and Emory University School of Medicine, located in Atlanta, Georgia, are actively seeking a full-time pediatric interventional radiologist to join our growing Interventional Radiology (IR) practice. With five full-time pediatric IR faculty positions, two IR advanced practice providers and a dedicated outpatient pediatric IR clinic staffed with a dedicated IR clinic nurse, our practice is one of the most robust IR practices in the U.S. focused solely on the care of children and adolescents. We also oversee a dedicated pediatric interventional radiology fellowship—non-Accreditation Council for Graduate Medical Education (ACGME), with one fellow per year.

Qualifications include:

- American Board of Radiology (ABR)-certified or board-eligible
- Completion of an Accreditation Council for Graduate Medical Education (ACGME)-accredited residency or fellowship in interventional radiology, or subspecialty certification in pediatric interventional radiology

Radiology Services at Children's

- Children's is one of the largest pediatric radiology programs in the country, performing more than 300,000 imaging tests each year. We cover nearly 650 inpatient beds across two hospitals, Scottish Rite and Egleston.
- Beginning in fall 2024, we will be operating five IR suites (three bi-plane units and two single-plane units) daily.
- Our practice has a dedicated pediatric-trained anesthesia team at both hospitals daily.
- In addition to a dedicated IR outpatient clinic, we also participate in one of the largest multidisciplinary vascular anomalies clinics in the country, with more than 700 new patient visits in 2022. Our practice performs more than 400 sclerotherapy procedures per year for these patients.

Why Children's?

A trusted leader in pediatric healthcare for more than 100 years, Children's is continually recognized as one of the nation's leading pediatric care providers by U.S. News & World Report, with many of our specialty programs ranking among the best in the nation. We are also one of the largest pediatric healthcare systems in the country, with 673 licensed beds and more than 1.1 million patient visits annually. Through our academic partnership with Emory University—ranked No. 1 nationally in National Institutes of Health (NIH) funding for pediatric departments—we actively participate in clinical studies aimed to advance pediatric medicine and transform the way we care for kids and teens.

You can be part of our greatest endeavor yet to transform the future of pediatric medicine. The demand for specialized pediatric care has never been greater in our community. As part of our dedication to advanced care, clinical research, education and training, we are expanding our North Druid Hills campus. The centerpiece of this 70-acre campus will be Arthur M. Blank Hospital, a 19-story, 1.5-million-square-foot hospital opening in 2024. Thoughtfully designed from the ground up with input from all stakeholders, including physicians and patients, this is more than just a building. It is a giant leap forward in our ongoing effort to deliver cutting-edge care, improve outcomes and innovate to meet the healthcare challenges of tomorrow.

Better Together: Children's Healthcare of Atlanta and Emory University

Children's and Emory University work together to facilitate leading-edge pediatric care, research, training and innovation. Through this unique and lasting partnership, more than 500 of our physicians hold titles at both independent institutions. That means, when you join our team, you'll also join the faculty at Emory University, one of the leading academic institutions in the nation. (Faculty rank will be commensurate with experience.)

The benefits of this partnership extend to both institutions, patients needing advanced care, aspiring physicians and clinicians like you seeking to broaden their experience. Emory University offers ample opportunities for teaching, career development and collaboration as you explore your research interests.

An Open Door to Opportunity

- Make an impact by deploying discoveries made in Emory University's research lab in real, lifesaving situations at Children's. Within Emory's Health Sciences Research Building II (HSRB-II), a quarter of the assignable lab space in this 350,000-square-foot building will be devoted to pediatric biomedical research to study the prevention and treatment of disease.
- Train physicians of tomorrow at the primary teaching site for Emory School of Medicine's 30+ pediatric ACGME-accredited fellowships and residencies.
- Advance your practice in an excellent clinical environment with high-volume clinical services, alongside faculty with superior research and scholarly expertise.
- Collaborate with some of the top minds in your field as you strive to make kids better today and healthier tomorrow.

Make Atlanta Your Home

As a physician, you have special considerations when it comes to putting down roots. Atlanta offers the professional environment you need to further your practice—and the cultural and social environment that you want for yourself and your family.

- This is a diverse city, which means your patients will come from a variety of cultural, religious, ethnic and socioeconomic backgrounds.
- As the only freestanding pediatric health system in Georgia, Children's patient volumes are high, and our patients come from all over the state.
- Atlanta has a lower cost of living than many other major cities, and it is consistently ranked among the top places to move to in the country.
- The Atlanta community is known for its walkable neighborhoods, thriving arts and culture scene, pro sports teams, as well as its many green spaces and sunny weather.
